

Mailchimp Integration

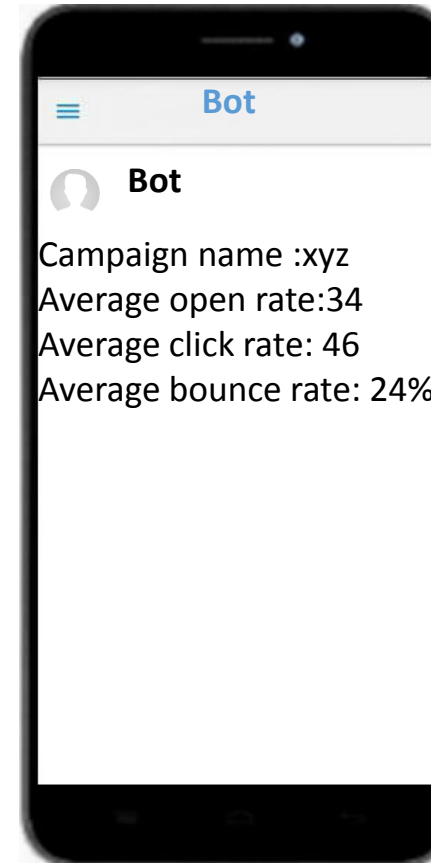

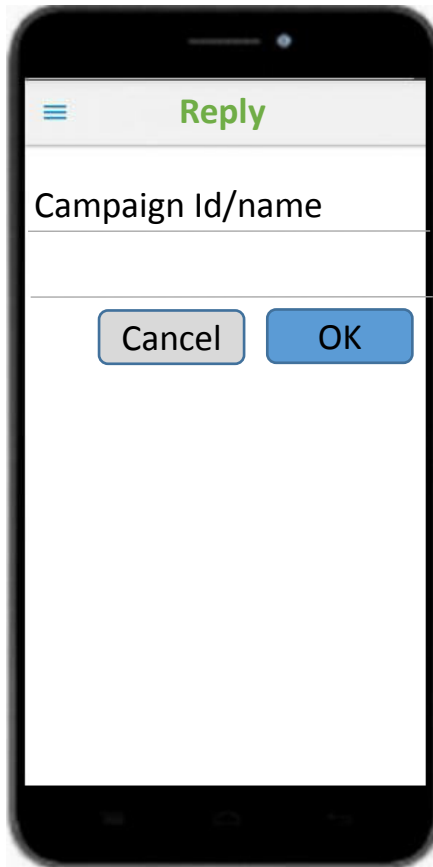

Type 'mailchimp' to connect with your mailchimp account

help: To get list of all keywords
report summary: report bounces, clicks detail of a campaign
Track list: notify if somebody subscribe or unsubscribe a list
notify abuse report: get notification and email who complained about a particular campaign

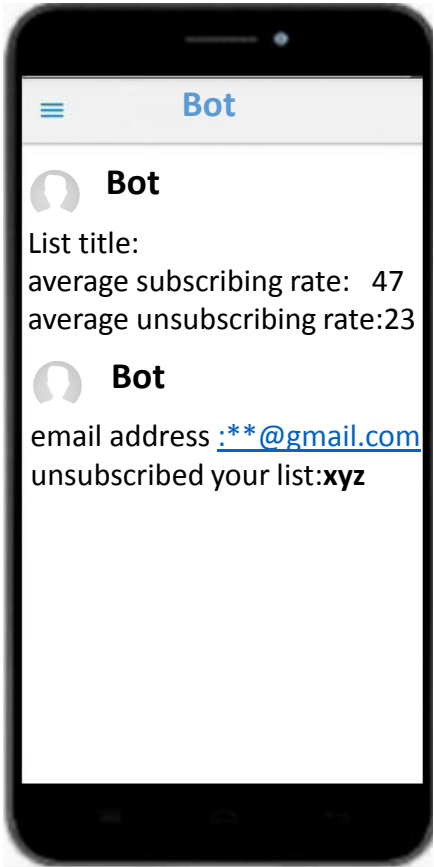

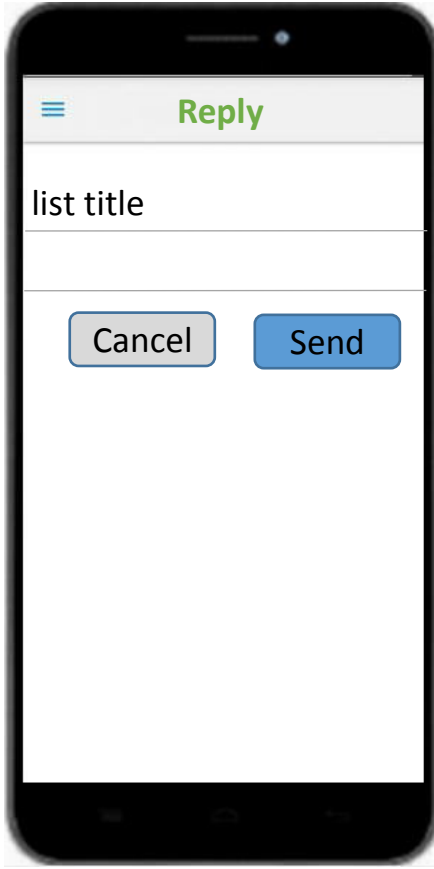

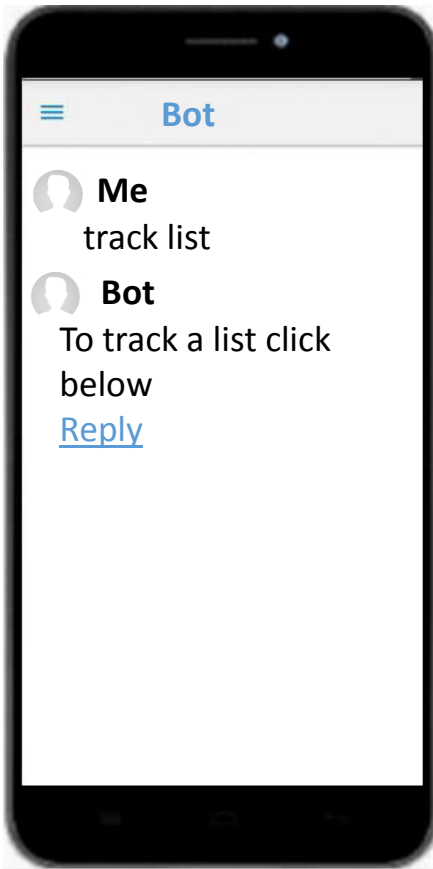

To get report summary of a campaign: keyword 'report summary'

Report summary will provide average open rate, average click rate and average bounce rate

To get subscriber and unsubsubscriber notification: keyword 'track list'

By track list we can track any list and get subscribing and unsubscribing rate and get notified when somebody subscribe or unsubscribe the list

To get notification when somebody complain about campaign: keyword 'abuse report'

By this we can get notification when somebody complain about any campaign and get their emails
