

- We will have a bot for slack with name 'Slack Bot'.In this bot if type 'Connect\_slack', Slack Bot will ask us to click on option 'connect'.
- If we click on 'connect' a pop up will appear where we have to enter our team's Slack domain and press continue.

-In similar way two other pop up will appear one followed by other asking for email Id and password.

A screenshot of a mobile application interface. At the top, a grey bar contains the word "Reply" in green. Below this, the text "Enter your email address for brajesh22.slack.com" is displayed. A text input field with the placeholder "Your email address" is shown. Below the input field is a grey "Continue" button. At the bottom of the dialog, there is a link that says "Take a minute to review our Privacy Policy". A standard QWERTY keyboard is visible at the bottom of the screen.

A screenshot of a mobile application interface, similar to the first one. At the top, a grey bar contains the word "Reply" in green. Below this, the text "Enter your password for brajesh22.slack.com" is displayed. A text input field with the placeholder "password" is shown, followed by a small orange question mark icon. Below the input field is a grey "Continue" button. A standard QWERTY keyboard is visible at the bottom of the screen.
