Hi, I'm ROOM Bot.

I'll help you to interact with your friends or relatives with the help of video chat.

Write a command "Room" for extracting the link.

After that just click on the image and it will redirect you to a page, Where you will find a Start video chat button.

Clicking on it will redirect you to a page Where you will find a link , Copy that link and paste it in the reply with the Email Id of the person you want to interact with.
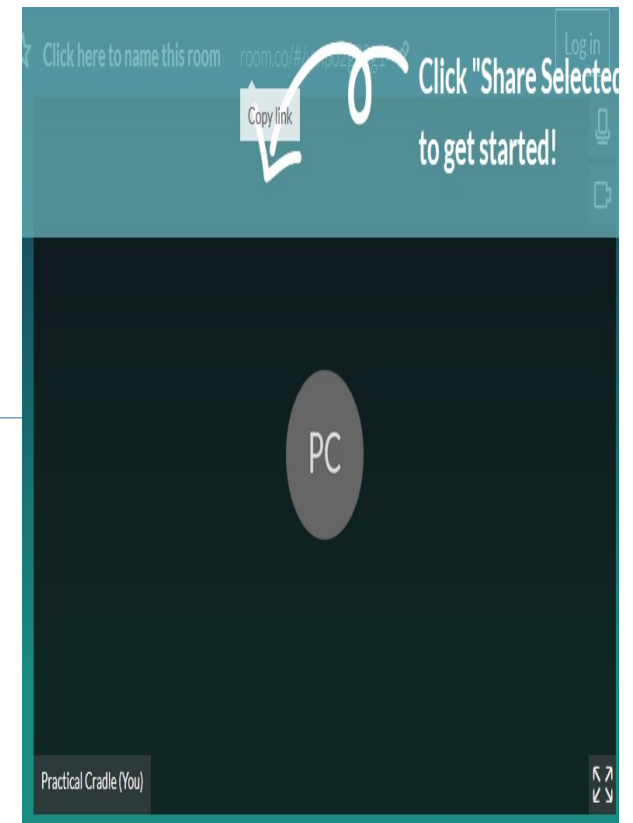

Help is the keyword to initiate the bot

On entering keyword the introduction message arrives And it asks you to enter another keyword "Room" which creates a image on clicking which it directs to the room webpage

ROOM

ENTER

Room is the keyword which
when clicked directs the user
to the room webpage
where the user gets a URL

After the user is
redirected
to
The new page he will
have to copy the
Link and paste it
in the form below

Click here to name this room   room.co/#   Log in

Copy link   Click "Share Selected
                  to get started!
